

Stap 1: We klikken eerst op Setup

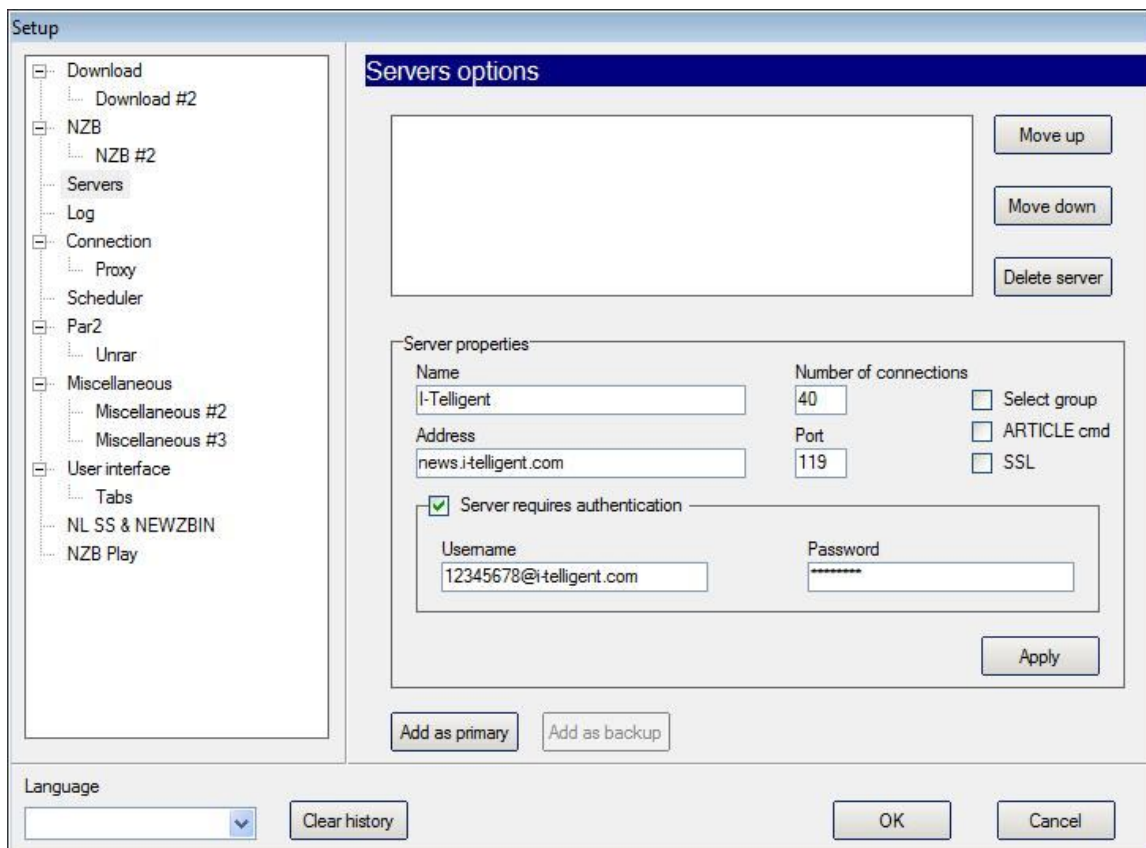

Stap 2: Hier stelt u de "Default download folder" in, hier gaan de gedownloadde bestanden naar toe. Vink de hokjes aan zoals op de foto.

Stap 3: Vink de hokjes aan zoals op de foto.

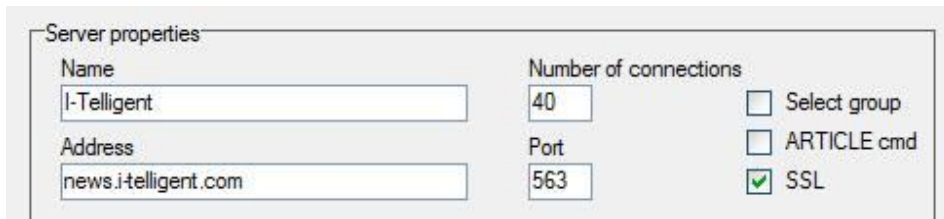

Stap 4: Hier vult u de gegevens in die wij u hebben toegezonden, nadat u alles heeft ingevuld dient u op "Apply" te klikken en daarna op "Add as primary"

Kabel klanten (UPC, Ziggo) moeten het hokje SSL aanvinken

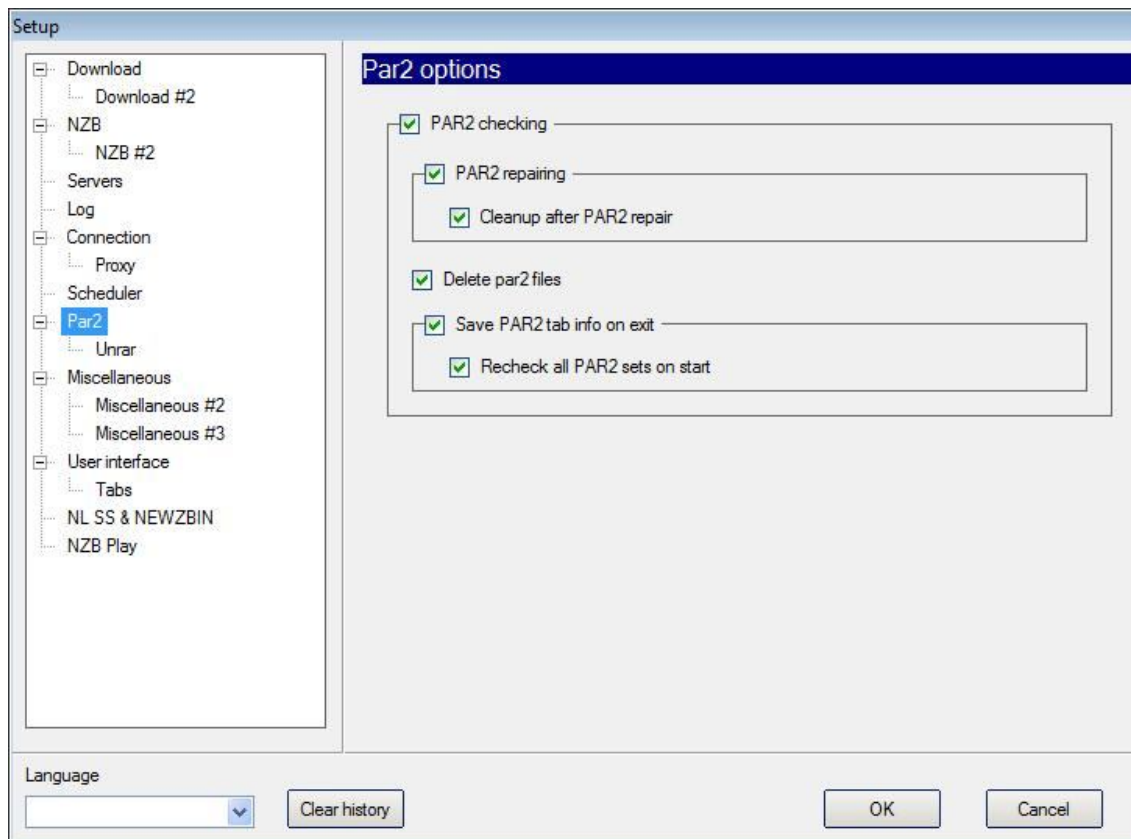

Dit helpt tegen trafficshaping.

The screenshot shows a 'Server properties' dialog box with the following fields and options:

Name	I-Telligent	Number of connections	40	<input type="checkbox"/> Select group
Address	news.i-telligent.com	Port	563	<input type="checkbox"/> ARTICLE cmd
				<input checked="" type="checkbox"/> SSL

Stap 5: Vink de hokjes aan zoals op de foto.

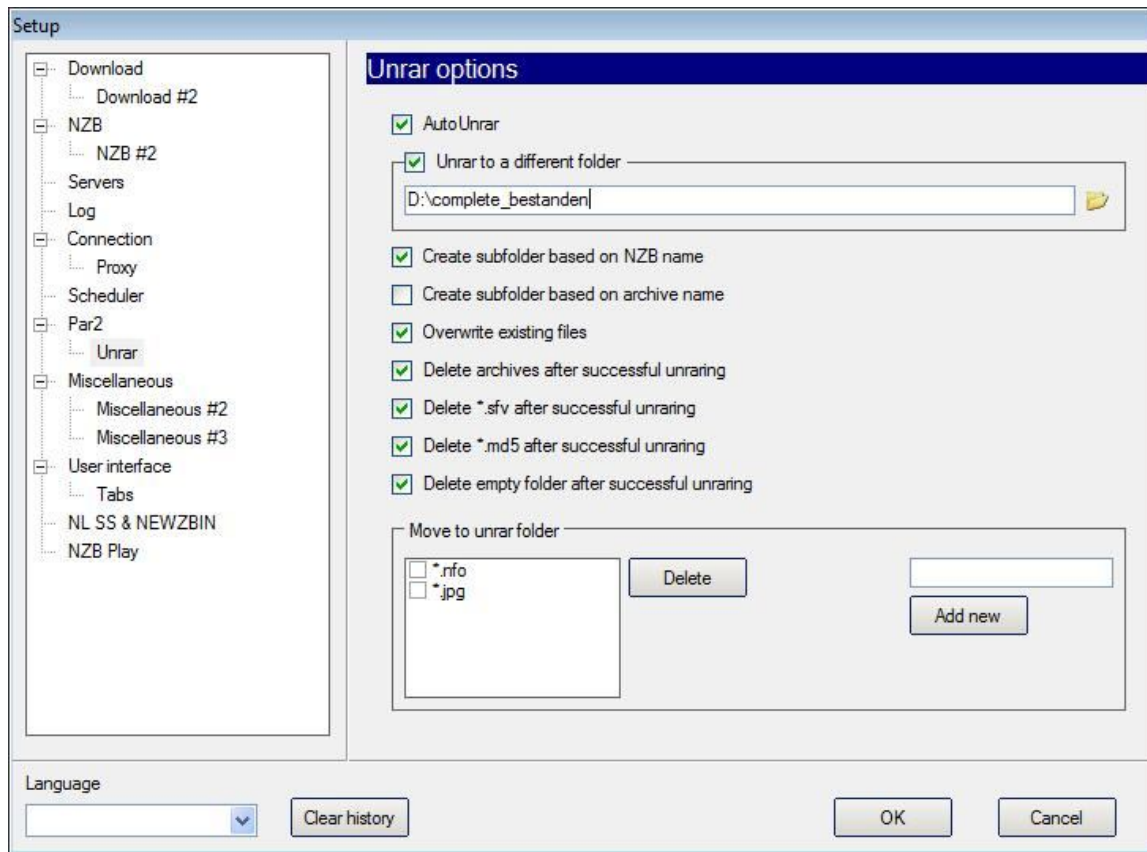

The screenshot shows the 'Setup' dialog box with the 'Par2 options' tab selected. The left sidebar shows a tree view with 'Par2' highlighted. The main area contains the following options:

- PAR2 checking
 - PAR2 repairing
 - Cleanup after PAR2 repair
- Delete par2 files
- Save PAR2 tab info on exit
 - Recheck all PAR2 sets on start

At the bottom, there is a 'Language' dropdown menu, a 'Clear history' button, and 'OK' and 'Cancel' buttons.

Stap 6: Vink de hokjes aan zoals op de foto.

Als deze instellingen 1 op 1 zijn overgenomen dan bent u gereed om te downloaden.
